INSURANCE

“How might we develop new ways to optimize interactions to enhance agent relationships and ultimately deliver superior customer service?”

“The more you question it, the better its answers. By repeatedly challenging AI to improve suggestions, you’ll come up with incredible material. The immediate efficiencies aren’t impressive. But improvements from iterating with it—speed, productivity, creativity—will be tremendous in the long term.”

Joe Riesberg

Senior Vice President &
CIO, EMC Insurance

What if AI...

...isn't just about efficiency, but also about possibility?

...isn't only about answers, but also about options?

Seed Generation

Leveraging AI's ability to make unexpected connections across vast domains of information to break free from our usual thought patterns.

**200 ideas before we get to
great ideas.**

AI helps us get there.

3 CURIOSITY PROMPTS

1. Show me how 5 different generations might experience my topic differently, then challenge our assumptions about what we believe to be true.
2. Give me 3 unexpected metaphors for my topic from. What interesting and unique insights does each reveal?
3. How would 3 improv comedians approach our campaign as content marketers? (Yes, and... vs No, because...)

Pattern Recognition

AI can help us exponentially expand what's possible because it can help us identify unique, quirky, never-seen-before patterns in our seeds that can lead us to a world of original ideas.

HEINZ DRAW KETCHUP

ESTD 1869

WE ANONYMOUSLY ASKED PEOPLE AROUND THE WORLD TO DRAW KETCHUP. THEY ALL DREW HEINZ.

IDEA

We conducted an experiment with participants across 5 continents – in anonymous focus groups, on international video calls, and with man-on-the-street surveys. They were given a simple task: “Draw ketchup.” The result? They all drew Heinz. Their drawings then became a global out-of-home campaign, and in-store Heinz bottles had their iconic label swapped for participant’s drawings. No matter how messy the drawings were, they were still unmistakably Heinz.

BACKGROUND

This year, artificial intelligence programs that generate images from text became a viral sensation. Everyone wanted to test these text-to-image programs with prompts ranging from "Dog on a skateboard" to "Yoda playing guitar." As a brand who has long been synonymous with "ketchup," we wanted to test these AI programs for ourselves.

IDEA

In a first-of-its-kind campaign, we asked DALL-E 2, the most advanced AI image generator, what "ketchup" looked like. The result? Even to AI, ketchup looks like Heinz. As the prompts got weirder, from "Renaissance Ketchup Bottle" to "Ketchup Tarot Card", the AI still generated results that looked like Heinz. We took suggestions on social for new image prompts, displayed the results in a virtual gallery, and turned them into the first OOH and print campaign with visuals generated by artificial intelligence.

3 CURIOSITY PROMPTS

1. What hidden patterns connect my top 5 performing pieces? Remix these elements into 3 fresh content ideas.
2. Map the storytelling DNA of my best vs. worst content. Show me the winning formula and 3 ways to evolve it.
3. Analyze my content's engagement patterns across time, length, and format. Then creatively break these rules.

Angle Exploration

Deliberately viewing your topic through different professional and cultural lenses to uncover fresh perspectives.

from Nike's YouTube Benchmark

Decoding the **GOAT**
for the future **GOATS**

{ The Context }

On August 9th of 2022, Serena Williams announced her retirement from tennis, after remaining on top for over two decades. Two days later, Nike released a year-long study, in the form of avatars, showcasing what it takes to stay at such a high level of performance for so long.

{ The Achievement }

Never Done Evolving is more than a content, it's a game changer in the sports industry, and will help us find and train the next Serenas, Jordans, Ronaldos and so on.

{ The Idea }

After analyzing all data and footage from official tournaments throughout Serena's career, machine learning was able to model each era's playing style - decision making, shot selection, reactivity, recovery and agility. The data collected is already being used by Nike to improve their products' technology and also their athletes' performance.

{ The Match }

In order to make our data accessible and inspiring for everyone in the world, we've transformed it into a live virtual match, in which the 17 year old Serena, the age she won her first Grand Slam, faced the 35 year old Serena, the age she won her 23rd Grand Slam. The live match was a result of 130,000 matches generated using Vid2Player technique, developed by Stanford University. At the end of every game, Josh Appel showcased the study's main insights.

//:: The most **accurate** and **detailed** virtualization ever done with an athlete. ::\

3 CURIOSITY PROMPTS

1. What are 10 insights experts 50 years in the future would find most surprising that we didn't see in how we approach [topic] today?
2. What are the 3 most counterintuitive truths about [topic] that our audience needs to understand?
3. If [our topic] was a character in a movie, what genre would best tell its story and why? Break down the narrative elements.

Remix

No idea is ever the best idea the first time you work on it. In fact, many of the greatest ideas are a mix of two or more existing ideas.

Nutella defends its use of palm oil, deemed a 'potential health concern'

By [Susan Scutti](#), CNN

Nutella maker wins court battle over rival's 'illegal' palm oil claims

Ferrero rival in Belgium claimed its palm oil-free spread was better for the planet and consumers' health

RESULTS

- 7,000,000 jars sold out within a month
- 3M+ reached on Facebook
- 10,000 videos created by fans for social media

3 CURIOSITY PROMPTS

1. Take [core concept] and blend it with principles from [unrelated discipline] to create a fresh perspective for our audience.
2. Transform our standard [content type] about [topic] into three unconventional formats that would surprise our audience.
3. Take the key insights from [current trend] and [historical event] to create a fresh perspective on [topic].

Kindle Experiments

Test your ideas in small, controlled ways to see what catches fire. These experiments should be quick to implement and low-risk, but capable of igniting bigger ideas or innovations.

<AI made this ad so we
could have a break!>

Take a break

Have a 'break, have a 

3 CURIOSITY PROMPTS

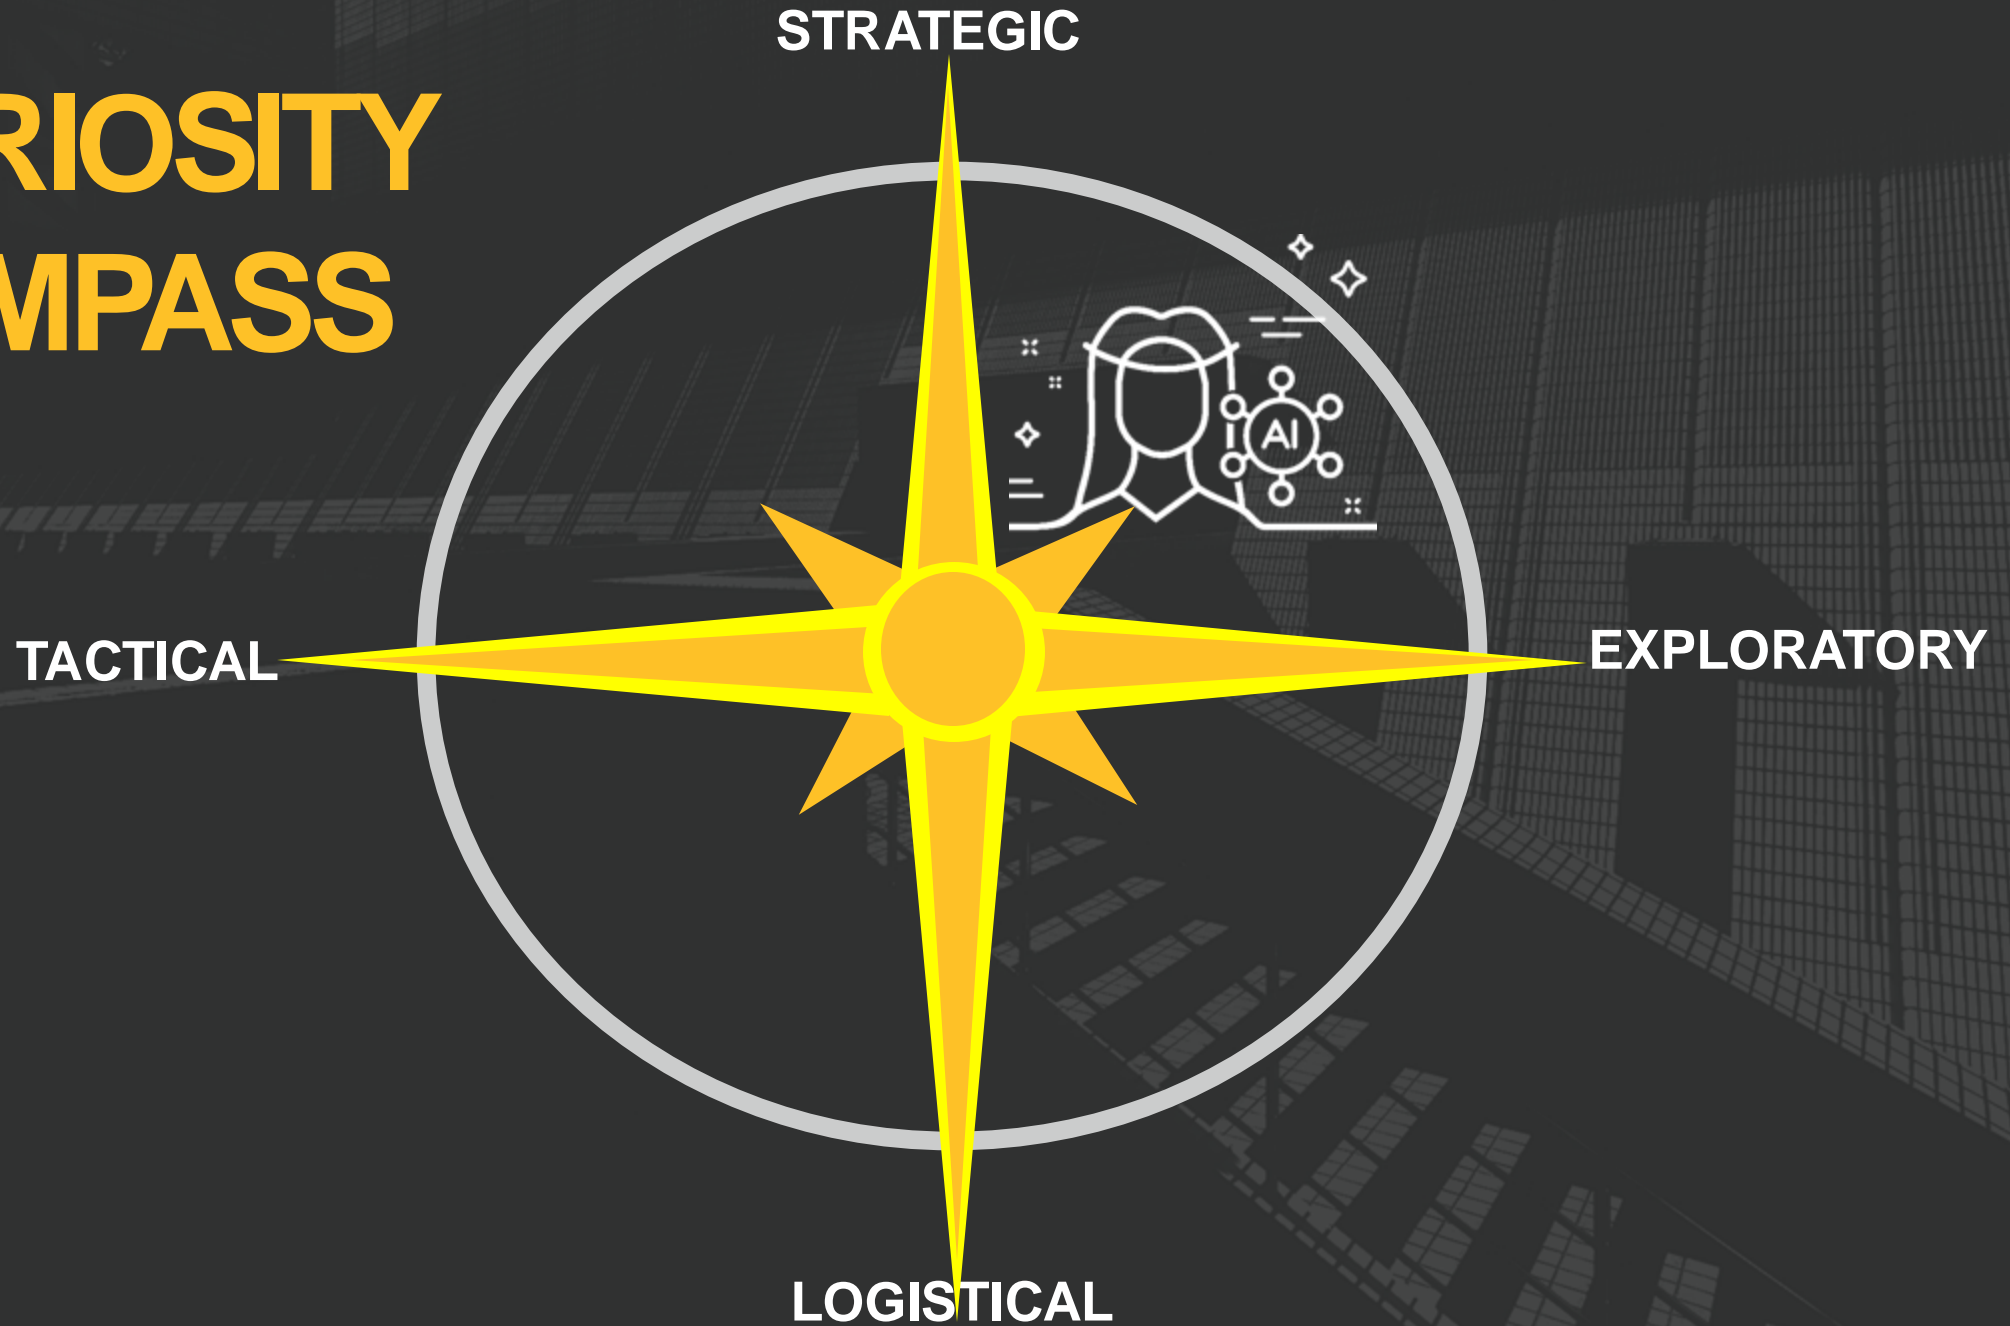

1. Design an A/B test for [content piece] that challenges our most basic assumption about our audience's preferences.
2. Create three radically different content experiments that would each validate or disprove [core marketing belief].
3. Develop a 'wild card' content strategy that intentionally breaks our top 3 content rules - what could we learn?
